Firewall Configuration and Testing Report

This report documents the configuration and testing of firewall rules on Windows using Windows Defender Firewall. It includes steps followed, rules created, and verification through screenshots.

- 1. Open Windows Defender Firewall configuration tool.
- 2. Listed current firewall rules using the GUI.
- 3. Added a rule to block inbound traffic on Telnet port 23.
- 4. Tested the rule by attempting a connection to port 23 (it was blocked).
- 5. (Linux step skipped for Windows).
- 6. Removed the block rule to restore the original state.
- 7. Documented all steps and screenshots.
- 8. Summarized firewall's role in filtering traffic.
